# Damilola Olawoore

Full-Stack / Backend Developer

Ibadan, Nigeria | damilolaolawoore03@gmail.com | 07046097860 | linkedin.com/in/htcode | htcode.vercel.app

## Summary

Full-stack and backend developer with 3+ years of experience building web applications, APIs and data-driven systems. Currently shipping production features for CVtoCareer, a career advisory platform used by real clients, across four codebases (two Express/TypeScript backends, two Next.js frontends) on shared PostgreSQL and Redis. Experienced with PII encryption, AI-assisted classification, BullMQ job processing and payment integrations. Core stack: Django/DRF, Next.js, TypeScript, PostgreSQL and MongoDB.

## Experience

**Software Developer** | CVtoCareer (C2C) Jul 2025 - Present | Remote

- Built an AI job classification pipeline (Llama 3.3 70B on DigitalOcean Gradient) that scores discovered jobs as HQA/MQA/LQA, with robust JSON parsing, non-blocking execution and a resumable backfill script for historical jobs; routes MQA jobs to Slack for approval.
- Normalised messy job data: Excel hyperlink title extraction, location and remote keyword cleanup with de-duplication, and Australian state inference from 60+ Perth suburb mappings.
- Delivered the Missing Info feature end to end: staff backend (templates, requests, bulk reminders, cancel/decline/reuse/expire), expiry cron job, audit trail on every lifecycle action, and a customer flow for reviewing and viewing submissions.
- Strengthened PII handling: routed email and phone lookups through hash-based helpers across both backends, fixed a Sequelize hook that left encrypted fields null after updates, and added decrypt failure logging.
- Built CEC tracking models, CRUD routes and admin frontend components (DataTable, DetailDrawer, KPICard) with role-based routing; added PayPal payment refresh and CV upload follow-up emails.

**Freelance Software Developer** | Kreva & Co. Jan 2026 - Present | United Kingdom

- Build responsive, SEO-optimised websites and content-managed applications with Next.js, React and MongoDB, using AI-assisted workflows to speed up development and debugging.
- **Egmos Montessori School** (egmos.org.uk): full-stack platform with a JWT-secured admin dashboard for school news, term dates and the student gallery.
- **RCCG Providence Centre**: church management system with a secure admin portal, donation tracking and contact management.

**Backend Developer (Freelance)** | Flash Jul 2025 - Present | Remote

- Building the backend for a multi-chain crypto wallet supporting Ethereum, BSC, Solana and Bitcoin.
- Developed transaction broadcasting and reconciliation with real-time status tracking on Celery and Redis, and tuned Celery tasks for high-volume reconciliation.
- Implemented secure REST APIs for transaction preparation and blockchain monitoring.

**Backend Developer Intern** | Techies Collab Aug 2024 - Oct 2024 | Remote

- Built the backend for a B2B marketplace: REST APIs for authentication, products, cart and vendor dashboards, with advanced search.
- Integrated Paystack payments and JWT authentication in a five-developer Agile team.

**Frontend Developer** | RealOwn Realty Oct 2022 - Dec 2023 | Remote

- Built a custom analytics dashboard with real-time visualisation of user engagement.
- Created and optimised 15+ responsive components: 95+ PageSpeed score, 40% more organic traffic, 20% lower mobile bounce rate.
- Refactored 12+ reusable components with React hooks and ES6, cutting page load times by 28%.

**Full Stack Intern** | Zuri Team May 2022 - Aug 2022 | Remote

- Built a content management system with an analytics dashboard and an interactive learning platform.
- Implemented JWT authentication and CDN-backed media storage, reducing login response times by 60%.

## Skills

| | |
|---|---|
| **Languages** | TypeScript, JavaScript, Python |
| **Backend** | Node.js, Express.js, Django, Django REST Framework, Sequelize, BullMQ, Celery, Socket.IO, node-cron |
| **Frontend and data** | Next.js (App Router), React, Tailwind CSS; PostgreSQL, MongoDB, SQLite, Redis |
| **Security and AI** | JWT, bcrypt, OTP, AES-256-GCM, PII field encryption (pgcrypto); LLM classification, prompt engineering |
| **Tools and APIs** | Git, Docker, Postman, Vercel, Render, Koyeb, DigitalOcean; PayPal, Paystack, SendGrid, Slack API, Firebase, Cloudinary |

## Education

**B.Eng. Industrial and Production Engineering** | Federal University of Technology, Akure 2024
